

HSS TWIST DRILL EXTRA LONG

PRODUCT FEATURES

135° point angle with chamfering adjustment - enables quick drilling, while saving time during marking out. The drill bits are fully ground, which guarantees high accuracy and rectilinearity of holes. They are particularly useful for drilling with drill bushes. Extra long ground drills are used for drilling in steel, non-ferrous metals and plastics. Material - the highest quality refined HSS. Packed and sold in a case of 1 pcs.
