

PRODUCT FEATURES

Rectangular plastic bucket (22 litres, 6 gallons) with a flexible plastic handle. The bucket has two scales: 22 litres and 6 gallons for precise measurement of water used for cleaning the sponge float. To keep the water level above the grate 61636 for uniform sponge soaking, there is 11 litres (3 gallons) of liquid needed. The shape of sides inside the bucket enabling putting the grate 61636 in a stable manner. The set includes grate 61636 for separating cleaner and dirty water in the bucket and removing excess grout, washing, and uniform soaking of the sponge float. The set includes rollers 61635 for removing excess water from the sponge float after cleaning it on the grid. Possibility of mounting four wheels 61637 enabling the bucket to be moved in 360° range without having to carry it. Delivered in a box of 3 sets.
