

PRODUCT FEATURES

The grate of the grouting bucket removes excess grout, washes, and uniformly soaks the sponge float 61639, but it also keeps dirty water away from its cleaner portion. The sponge float is soaked in the upper water layer, which is cleaner, while more dirty water stays below the grate. Grate that can be used with the 61634 glazing bucket or as a replacement element in the 61630, 61631, 61632 glazing sets.

CODE	SIZE [MM]
